3 · Information about risks

Even with the most careful, hygienic work a residual risk remains. I have been informed in particular about:

- Infections and inflammation
- Allergic reactions to the material, also years later
- Scarring and keloids
- Swelling, bleeding, pain, circulatory reactions
- Colour changes, fading or blurring; the result also depends on skin and aftercare
- Removal is complex, costly and not always completely possible
- Possible skin reactions (e.g. burning) during MRI scans

4 · Consent

- ☐ I am of legal age (or the guardian declaration in section 5 is completed) and able to understand the consequences of the procedure.
- ☐ My health information is complete and true. I will report any changes before the procedure.
- ☐ I was informed orally and in writing about the procedure, risks and aftercare, could ask questions and received the aftercare guide (flyer/PDF).
- ☐ I have checked and approved the design, size, colours and placement (section 6). I understand that a tattoo is permanent.
- ☐ Before the procedure I was given the information on the labels of the tattoo inks used (incl. manufacturer, batch number, ingredients) – including any notice “Contains nickel / chromium (VI). Can cause allergic reactions.” ([REACH Annex XVII entry 75](#), Regulation (EU) 2020/2081).
- ☐ I consent to the procedure described. There is no entitlement to a specific healing result; statutory claims, in particular for injury to life, body or health, remain unaffected.
